Road to Restorative Evolution: Unification of Esthetics with Periodontal Health

About

This webinar shows the use edelweiss VENEERS for esthetic treatment of periodontal patients. This technique produces highly esthetic restoration in a single appointment with minimal sacrifice of tooth structure and minimal stress for the delicate periodontal tissue. Clinical cases of periodontal patients restored with edelweiss VENEERS are presented in this webinar and the step by step clinical t is described including tips and tricks to achieve optimal soft tissue response with edelweiss VENEERS.

Time & Place

Time: 5:00 PM (Manila/Singapore/HK)

Duration: 2 hours

Via Zoom Webinar

Language: English

Registration

Registration Fee: USD 50.00

Road to Restorative Evolution: Unification of Esthetics with Periodontal Health

*"Get maximum control over your next patient case outcome and reach your ultimate aesthetic goal. The edelweiss system gives you the flexibility and yet a minimal invasive approach to fulfill your patients dreams with no pain – within just one session."
Claudio Novelli.*

What you will learn: Lecture

- Why esthetic restoration is critical for successful treatment of periodontal patients
- What are the main differences between edelweiss VENEERS and edelweiss LONG VENEERS for restoration of periodontal patients
- When edelweiss VENEERS are indicated for treatment of periodontal disease
- How to use edelweiss NH composite shades and Effect Shades for elongated periodontal teeth
- Shade selection of edelweiss VENEERS for difficult color cases
- Data research about the edelweiss system
- Tips and tricks for successful restoration with edelweiss VENEERS

Clinical Case Presentation

This Webinar shows the step by step procedure for restoration of a periodontal patient with large gingival recessions and black triangles using edelweiss LONG VENEERS. The step by step clinical procedure is described including the tips and tricks to achieve optimal esthetics and optimal soft tissue response with edelweiss VENEERS in periodontal patients.
