Road to Restorative Evolution with edelweiss dentistry

Synopsis

edelweiss dentistry GmbH is an innovative Austrian manufacturer that has established itself in the marketplace with unique concept for product development to offer the dental market.

The edelweiss product range comprises 6 distinctive categories of restorative system for dental use. The minimally invasive and biomimetic concepts and versatile range of applications together with the time and cost-saving application make edelweiss dental products an investment in the future – entirely in the interest of the dental trader, patient, and user.

On the 31st of May 2023, Dr. Moodley and Dr. Lampl acclaimed academicians, researchers, masters in their own field of expertise in restorative dentistry. They will conduct a presentation under the title of “Road to Restorative Evolution with edelweiss dentistry” that covers the unique features of edelweiss SYSTEMS.

This presentation is for dentists, distributors, and dental technologists that are keen to learn and adopt the revolutionary concept in dentistry and create a niche in your competitive market.

The 6 edelweiss product categories:

edelweiss SYSTEMS

- VENEER
- OCCLUSIONVD
- COMPOSITE
- POST & CORE
- PEDIATRIC CROWN
- CAD/CAM BLOCK
