DENTISTRY

Clinical workflows for perfect smiles using innovative minimal or non-invasive procedures, bringing harmony and balance to the face naturally. Discover your smile!

Conservative treatments that modify the shape, size, and color of the teeth to meet patient's expectations, is leading the way in esthetic trends. edelweiss dentistry is at the forefront of this minimally invasive esthetic trend.

The edelweiss Direct VENEER and OCCLUSIONVD systems fulfill patient's bio-logical, bio-mechanical and bio-esthetic needs and does not require additional steps like anesthesia, impressions, temporary restorations, etc. – resulting in cost and time saving for the dentists and patients.

AIMS OF THE COURSE

In this edelweiss Advanced Workshop, minimal and non-preparation esthetic procedures will be shown from digital smile design to final cementation. Full mouth rehabilitation cases from opening of the vertical dimension and splint therapy will be taught. Digital workflows from designing, tooth preparation, milling procedures and finishing of the final CAD/CAM restorations will be demonstrated.

Delegates will work with edelweiss VENEER and OCCLUSIONVD systems on plaster models on advanced cases like midline diastema closures, rotated teeth etc. At the laboratory, our master dental technician will demonstrate the use of articulators and how to open the vertical dimension. During the live patient demonstration delegates can follow all the clinical steps.

Following this advanced workshop, delegates will be able to identify unmet patient's needs to boost their esthetic procedures and optimize their business.

edelweiss dentistry invites you to their Headquarters in Wolfurt, Austria to experience a novelty in the dental world.

Dear Doctor, we welcome you to the edelweiss dentistry family!

LECTURERS

Stephan Lampl

ALL INCLUSIVE WORKSHOP

NOTE

Course language: English

Deadline for cancellations
of the participants:

8th September 2023

INCLUDING

- Ground transportation – dinner locations, office and hotel
- Accommodation for four nights
- Food and Beverages
- Material for the workshop
- Group dinners on 11th, 12th and 13th October
- Observing application of edelweiss SYSTEMS on Live Demo
- Dentists' own models are getting analyzed during workshop*
- Post-workshop support

* THE OPPORTUNITY:

Bring your patient's plaster models and analyze the cases under professional supervision during the workshop. Please take into consideration that many patient cases are suitable for starting to work successfully with edelweiss dentistry products. However, some cases may be refused due to situations, such as severe crowding for instance. Therefore: for evaluation purposes, pictures of plaster models need to be sent to your dealer prior to the course.

Full reimbursement of registration fee is guaranteed if the cancellation happens not later than 8th September. No reimbursement in case of cancellation after that date.

We reserve the right to cancel the event in case of circumstances beyond our control.
In such case your course fee will be refunded in full.

Certificate

A certificate of attendance will be provided at the end of the course.

edelweiss headquarters with integrated dental office „smile center“ and workshop facilities.
