DENTISTRY

Advanced Concepts in Restorative Dentistry

Keep up with the ever-changing cutting-edge esthetic dentistry.

MORNING LECTURE

More and more dentists are now moving to digital dentistry. World renowned speakers, Drs Stephan Lampl, Desigar Moodley and Carlos Enrique Bello will teach you everything you need to know about the CAD/CAM design. We cover a complete overview of CAD/CAM design materials and equipment and the key aspects to consider when designing restorations so that you can create beautiful restorations that fit perfectly with no adjustment required at all. Learn from our CAD/CAM experts.

We will take you through a series of clinical cases to discuss the latest trends in Esthetic, Digital and Biomimetic Dentistry. Following biomimetic principles, minimal and non-preparation esthetic procedures will be shown through easy-to-use clinical procedures from smile design to cementation procedures. Full mouth rehabilitation clinical cases will be discussed step-by-step from splint therapy, opening of the vertical dimension to cementation of final restorations.

AFTERNOON

LIVE PATIENT DEMONSTRATION (4 Hours)

In the "look over the shoulder" live patient demonstration, you will get first-hand opportunity to watch over our expert work on a patient.

You will be able to follow step by step clinical procedures on the placement of Veneers in an esthetic patient treatment.

LECTURERS

Stephan Lampl
B.D.S. M.D.T. B.B.A.
CEO & founder edelweiss dentistry

Desigar Moodley
PhD, Msc Dent, PDD Aesthetic, B.D.S.
Chief Scientific Officer

Carlos E. Bello Delgado
D.D.S.
KOL South America

LEARNING OUTCOMES

- To identify and fulfil unmet patient's needs to boost elective treatments within your office and optimize your practice business by applying these protocols and materials that is time and cost saving.
- Understand the science and technical data of hybrid glass restorative material.
- Reach a high level of competence in various procedures, from the planning to the realization of the treatment during our live patient demonstration.
- Following this course, you will be confident and ready to follow these easy-to-use clinical steps in your clinic.
