VENEER OCCLUSIONVD COMPOSITE

UNIQUE BIO-CERAMIC ENAMEL SHELLS FOR ANTERIOR AND POSTERIOR RESTORATIONS

Thanks to the unique laser manufacturing process, the translucent enamel shells (VENEER & OCCLUSIONVD) stand out for their homogeneous single glass-ceramic phase embedded in a carbon matrix, through a process of sintering and vitrification of the glass particles.

The VENEERS and OCCLUSIONVDs represent the anatomic foundations for single or complete reconstructions and for increasing the vertical dimension in the posterior region. Hence, a functioning anterior cuspid guidance can also be obtained using edelweiss VENEERS & OVDs.

The difference lies in it's similarity with nature!

MINIMAL INVASIVE & COST-EFFECTIVE

	COMPOSITE	VENEER & OCCLUSIONVD
Flexural Strength	150 MPa	200 MPa
Compressive Strength	480 MPa	550 MPa
Flexural Modulus	12.5 (dentin) - 16 GPa (enamel)	20 GPa
Surface Hardness	80 HV	100 HV
Polymerization Shrinkage	2.50 %	—

ADVANTAGES

- One appointment
- Minimally invasive
- Natural look
- Long-lasting
- Biomechanical
- Biocompatible
- Antibacterial
- Economical

INDICATIONS

- Anterior and posterior restorations
- Tooth discolorations
- Anatomical deformities
- Diastema
- Erosion & Attrition
- Customized Veneers, Crowns & Bridges
- Crown facings
- Increasing the vertical dimension (OVD)

ALWAYS THE RIGHT SIZE

The edelweiss VENEERS and OCCLUSIONVDs are provided in different sizes. Using the edelweiss Sizing Guides, it is possible to easily determine the appropriate size of enamel shells.

VENEER Sizes: XS, S, M, L OCCLUSIONVD Sizes: S, M, L
